Color & Comfort

Who has access to a complete range of quality solvent inks for all graphics applications?

You do. With Streamline[®] inks.

Rethink your ink.

working for you.

SunChemical[®]
a member of the DIC group 
Color & Comfort

Sun Chemical is one of the world's foremost innovators and manufacturers of ink products.

Introduction

Digital inkjet is energizing and driving global growth in all sectors of the large format advertising market. Manufacturing innovations for printing systems and ink technology are enabling digital inkjet to push the boundaries in established and previously unforeseen markets.

Print service providers have access to a growing array of print technology, media and inkjet inks that offers almost infinite options to such diverse markets as packaging, vehicle graphics, point of sale advertising, sign making and labeling.

Sun Chemical is one of the world's foremost innovators and manufacturers of ink products and the manufacturer of Streamline inkjet ink technology.

What is Streamline?

Streamline is Sun Chemical's high quality brand of alternative solvent inkjet inks formulated for use in all popular wide format and super wide format printing machines.

Streamline inkjet inks are carefully formulated to match the performance, quality and colour of the original manufacturer's inks. Our inkjet inks can be mixed with the original inks so you reduce waste ink and ensure an easy changeover process. Our formulations have been matched to the original inks for colour and density and will not require re-profiling of your machine. Simply insert our ink cartridges and enjoy continued quality with greater economy.

EcoPro Ink Supply Units – Greater Economy

An EcoPro ink supply unit (ISU) and Streamline ink refill packs will increase the ink capacity of your machine and provide greater economy compared to inkjet cartridges. You'll also benefit from increased productivity and reduced waste.

We thoroughly check our EcoPro ISU's, assuring ease of use, continuous production and reliability. We offer a range of Streamline chips and electronic devices which have been fully tested for your machine. Schedule your print jobs to run unattended or over-night, you no longer need someone onsite to change an ink cartridge!

Engineering Support Services

Our engineering team is experienced and knowledgeable, supporting a wide range of wide format and super wide format printer models. Our services include on-site support for ink conversions, printer servicing, supply and installation of replacement parts as well as RIP / colour management profiling support.

Our engineering team is experienced and knowledgeable.

R&D Capability & Manufacturing

Our R&D facilities are amongst the best in the world, ensuring we formulate and manufacture robust and reliable inkjet products. Sun Chemical is also a leading supplier of pigments and colourants. This means we can access these materials to use with our inks, ahead of the competition.

With our analytical laboratories, we understand the complex inter-relationships between pigments, resins and additives at the molecular level. We conduct extensive jetting tests on our inks to ensure maximum print performance with the latest print heads and print equipment.

Our focus is on continuous improvement, delivering quality products, providing a dedicated service and an unparalleled understanding of inkjet technology which ensures that every Streamline product can be trusted to deliver consistent quality, performance and value.

Every Streamline product is guaranteed to provide 100% satisfaction and exceed your expectations.

Place your trust with Sun Chemical and contact your local Streamline distributor now and learn how you can start enjoying uncompromised quality with greater economy!
