Asanti

Asanti offers an automated workflow for the wide-format printer market. It streamlines your processes and ensures consistent results.

Overview

The huge variety of file types to be handled significantly slows down the processing of print jobs and often leads to errors. These difficulties are overcome with the Asanti software. Asanti automates your workflow for sign and display applications. It takes control of the entire process, from prepress to production and finishing. And along the way, it simplifies, optimizes and automates as many steps as possible. This leaves you with a high-performing solution, and increased productivity.

Asanti's comprehensive integration of file handling, color management and preflighting also means that your jobs will be error-free and ready to send to wide-format output devices. In other words: no more mistakes, no more stress, no more loss of time.

Key Benefits

- Streamlined workflow
- Easy-to-use interface
- Automatic PDF checking
- Adobe PDF Print Engine integration
- Multi-device compatibility

Features

Modular Structure

The Asanti Suite consists of several modules. Asanti Render uses the Adobe PDF Print Engine 3.7 to render files to a wide range of large-format printers. Asanti Production takes care of PDF creation and preflighting. And Asanti StoreFront is a web-to-print solution that enables you to manage online stores and process print orders automatically.

Do you want even more automation? Take a look at the Asanti Enhancers. They increase productivity and expand your output possibilities.

Advanced Integration

Asanti's advanced functionality generates compatibility to make sure that each process within the workflow is streamlined via a uniform, intuitive user interface. The use of a standardized JDF compliant job ticketing system means that all content and color is controlled and automated from start to finish, regardless of the output device. And full integration with RIPs and third-party print production systems enhances functionality while maintaining simplicity in operation.

Easy-to-use Interface

Asanti is designed to enhance the productivity of all output devices, whether a sign-maker or display producer has experience of fully-feature workflow software or is a first-time user. The Asanti GUI works with excellent visualization of the job layout and positioning: operators can see exactly what they are printing. All the necessary production parameters that were specified during job preparation are picked up by the engine, thus avoiding potential mismatches between file preparation and output. The GUI offers access to key print parameters to make sure any last minute changes are quick and easy to apply. Print progress and even printing time estimations are provided.

AsantiNetwork

AsantiNetwork contains a wealth of useful knowledge; nice-to-know information covering a wide range of Asanti technology topics, tips & tricks, release notes, user guides, software and downloads.
